

Full voltage non-reversing magnetic motor starter

Features

Magnetic Contactor

- UL maximum horsepower ratings to UL Standard 508
- Double break contact design
- One normally open auxiliary contact

Thermal Overload Relay

- Phase loss and phase imbalance protection
- Ambient temperature compensation
- Adjustable trip point setting

Hand-Off-Auto Switch

- Allows local or remote operation
- Local operation by turning switch to Hand
- Remote operation on any normally open, close-to-run, maintained contact device

NEMA 3R Enclosure

- Hinged cover
- Lockable hasp

Optional Remote Master Valve Start

- Accepts 24 VAC start signal

Standard Construction

- Magnetic Contactor
- Thermal Overload Relay
- Hand-Off-Auto (HOA) switch
- NEMA 3R Enclosure

Advantages

- Lowest initial cost
- Lowest maintenance cost
- Highest starting torque *

* Always check for restrictions on inrush current prior to installation
