## PRODUCTS > PRESSURE GAUGES

Pressure Gauges are dial-type mechanical instruments designed to measure pressure in a wide variety of applications. From general commercial and industrial use, to harsh applications like chemical/petrochemical and oil & gas, PIC Gauges are designed to meet or exceed industry standards and specifications. PIC Gauges stocks a wide variety of pressure gauges in dial sizes from 1" through 10" with copper alloy or 316SS internals and various case materials and mounting styles.

### DRY UTILITY GAUGES

High quality dry utility gauges for the broad commercial and industrial markets, these gauges are suitable for air, water, oil, gas and most other media not corrosive to brass.

### LIQUID FILLED BRASS INTERNALS

High quality liquid filled gauges for added durability in applications where vibration or pulsation is present. These gauges feature a weather-resistant and corrosion-resistant stainless steel case and bezel and are suitable for air, water, oil, gas and most other media not corrosive to brass.

### LIQUID FILLED STAINLESS INTERNALS

High quality liquid filled gauges for added durability in applications where vibration or pulsation is present. These gauges feature a weather-resistant and corrosion-resistant stainless steel case and internals, these gauges are suitable for air, water, oil, gas and most other media not corrosive to stainless steel.

### PROCESS GAUGES

Heavy duty gauges and process gauges are designed for applications where accuracy and durability are critical. Available in a wide variety of configurations, these gauges are fully adjustable and repairable for re-calibration. Phenolic cases include a solid front/blow out back design as an added safety feature.

### LOW PRESSURE GAUGES

Capsule type movement gauges designed for accurate measurement of low pressure and vacuum applications. The gauges are available with brass or stainless steel internals in a wide variety of configurations.

# INDUSTRIAL AND SPECIAL APPLICATION

Industrial and special application gauges are specialty gauges designed for specific applications. PIC Gauges offers a wide variety of special application gauges including products for Plumbing/HVAC, Test Gauges, Ammonia refrigeration, welding, tank truck, dental equipment and many more.
